EDUCATION

Saint Petersburg Electrotechnical University 'LETI'   Aug. 2019 - July 2023
Bachelor of Computer Systems Engineering and Informatics

PROJECTS

Avito Parser − *Python, Telebot, Requests*   Jan. 2022 – Feb 2022

- The parser collects information about new ads in real time. If the ad fits the criteria, a message about it comes to the Telegram.

Database for the store − *Java, MySql, Hibernate*   Feb. 2021 – May 2021

- A database for the store has been developed.
- The program allows to work with the database using Java tools.
- A user interface has been created.

School Projects − *Java*   Sep. 2018 – May 2019

- Implemented an RSA encrypt system.
- Made a comparison of the speed of self-writing sortings, with visualization in the form of graphs.

SKILLS

Languages: Python, Java, C/C++, SQL
Developer Tools: Git, Eclipse, PyCharm, Visual Studio
Python Libraries: NumPy, Pandas, MatPlotLib, Requests, Plotly
Skills: Calculus, Linear Algebra, Statistics

ACHIEVEMENTS

Open international student Olympiad in the discipline "informatics" − *Third-grade diploma*   Apr. 2022

Open international student Olympiad in the discipline "math" − *Participant of the final round*   Apr. 2022
